

*Fighting for a world where everyone with diabetes, no matter where they live,
has everything they need to survive and achieve their dreams.*

To: The World Health Organization:

We call on the World Health Organization to ensure its Type 1 Diabetes Treatment Guidelines support equitable access to modern, evidence-based diabetes care by:

1. Including insulin analogues as a standard of care for all people living with type 1 diabetes, recognizing their benefits for safety, flexibility, and quality of life;
2. Including insulin pens as a standard of care for all people living with type 1 diabetes, recognizing their advantages for dosing accuracy, convenience, portability, discretion and patient dignity; and

We further urge the World Health Organization to center the lived experiences of people with diabetes in all guideline and policy development processes.

Signed:
